

A microbiocide for broad spectrum protection against bacteria and fungi

Biozolone CMT is a powerful, wide spectrum in-can preservative for aqueous coating systems & similar water containing products. Because of it's unique formulation, it performs a pronounced biocidal activity, even at low concentrations.

Physical Properties

Appearance	Green Solution
%Active Ingredient	1.5 % min
Specific Gravity	1.02
pH	3.0 - 5.0
Solubility	Disperse in water based systems

Advantages of using this product:

- Broad spectrum activity against bacteria and fungi
- Biodegradable and non-persistent to environment
- Broad compatibility with surfactants and emulsifiers
- Rapid inhibition of microbial growth and enzyme synthesis
- Excellent cost performance
- Effective at low usage levels

Applications:

Typical use concentrations are in the range of 0.1 % - 0.6% base on the wet formulation weight of the final products.

Handling:

When handle Biozolone CMT, the usual precautions for handling of chemicals should be followed. Avoid contact with skin, wear goggles and gloves. In the event of spillage, clean the skin with plenty of water and soap, flush with water and buffer solution

Packaging:

25 kgs, 250 kgs plastic drums, or subject to requirement
